Sega Enterprises, Ltd.

Before Using This Service Manual

- Parts of the circuits are different in the GENESIS II depending on the model of IC11 (RGB encoder used). Check the model of IC11 on the main circuit board and identify the type, F, S or SM.

Type	Model of IC11	Part No.
F	IC MB3514PF-G-BND-EF	313-5232-A
S	IC CXA1145M-T6 SOP	313-5213-A
SM	IC KA2195D	313-5236-A

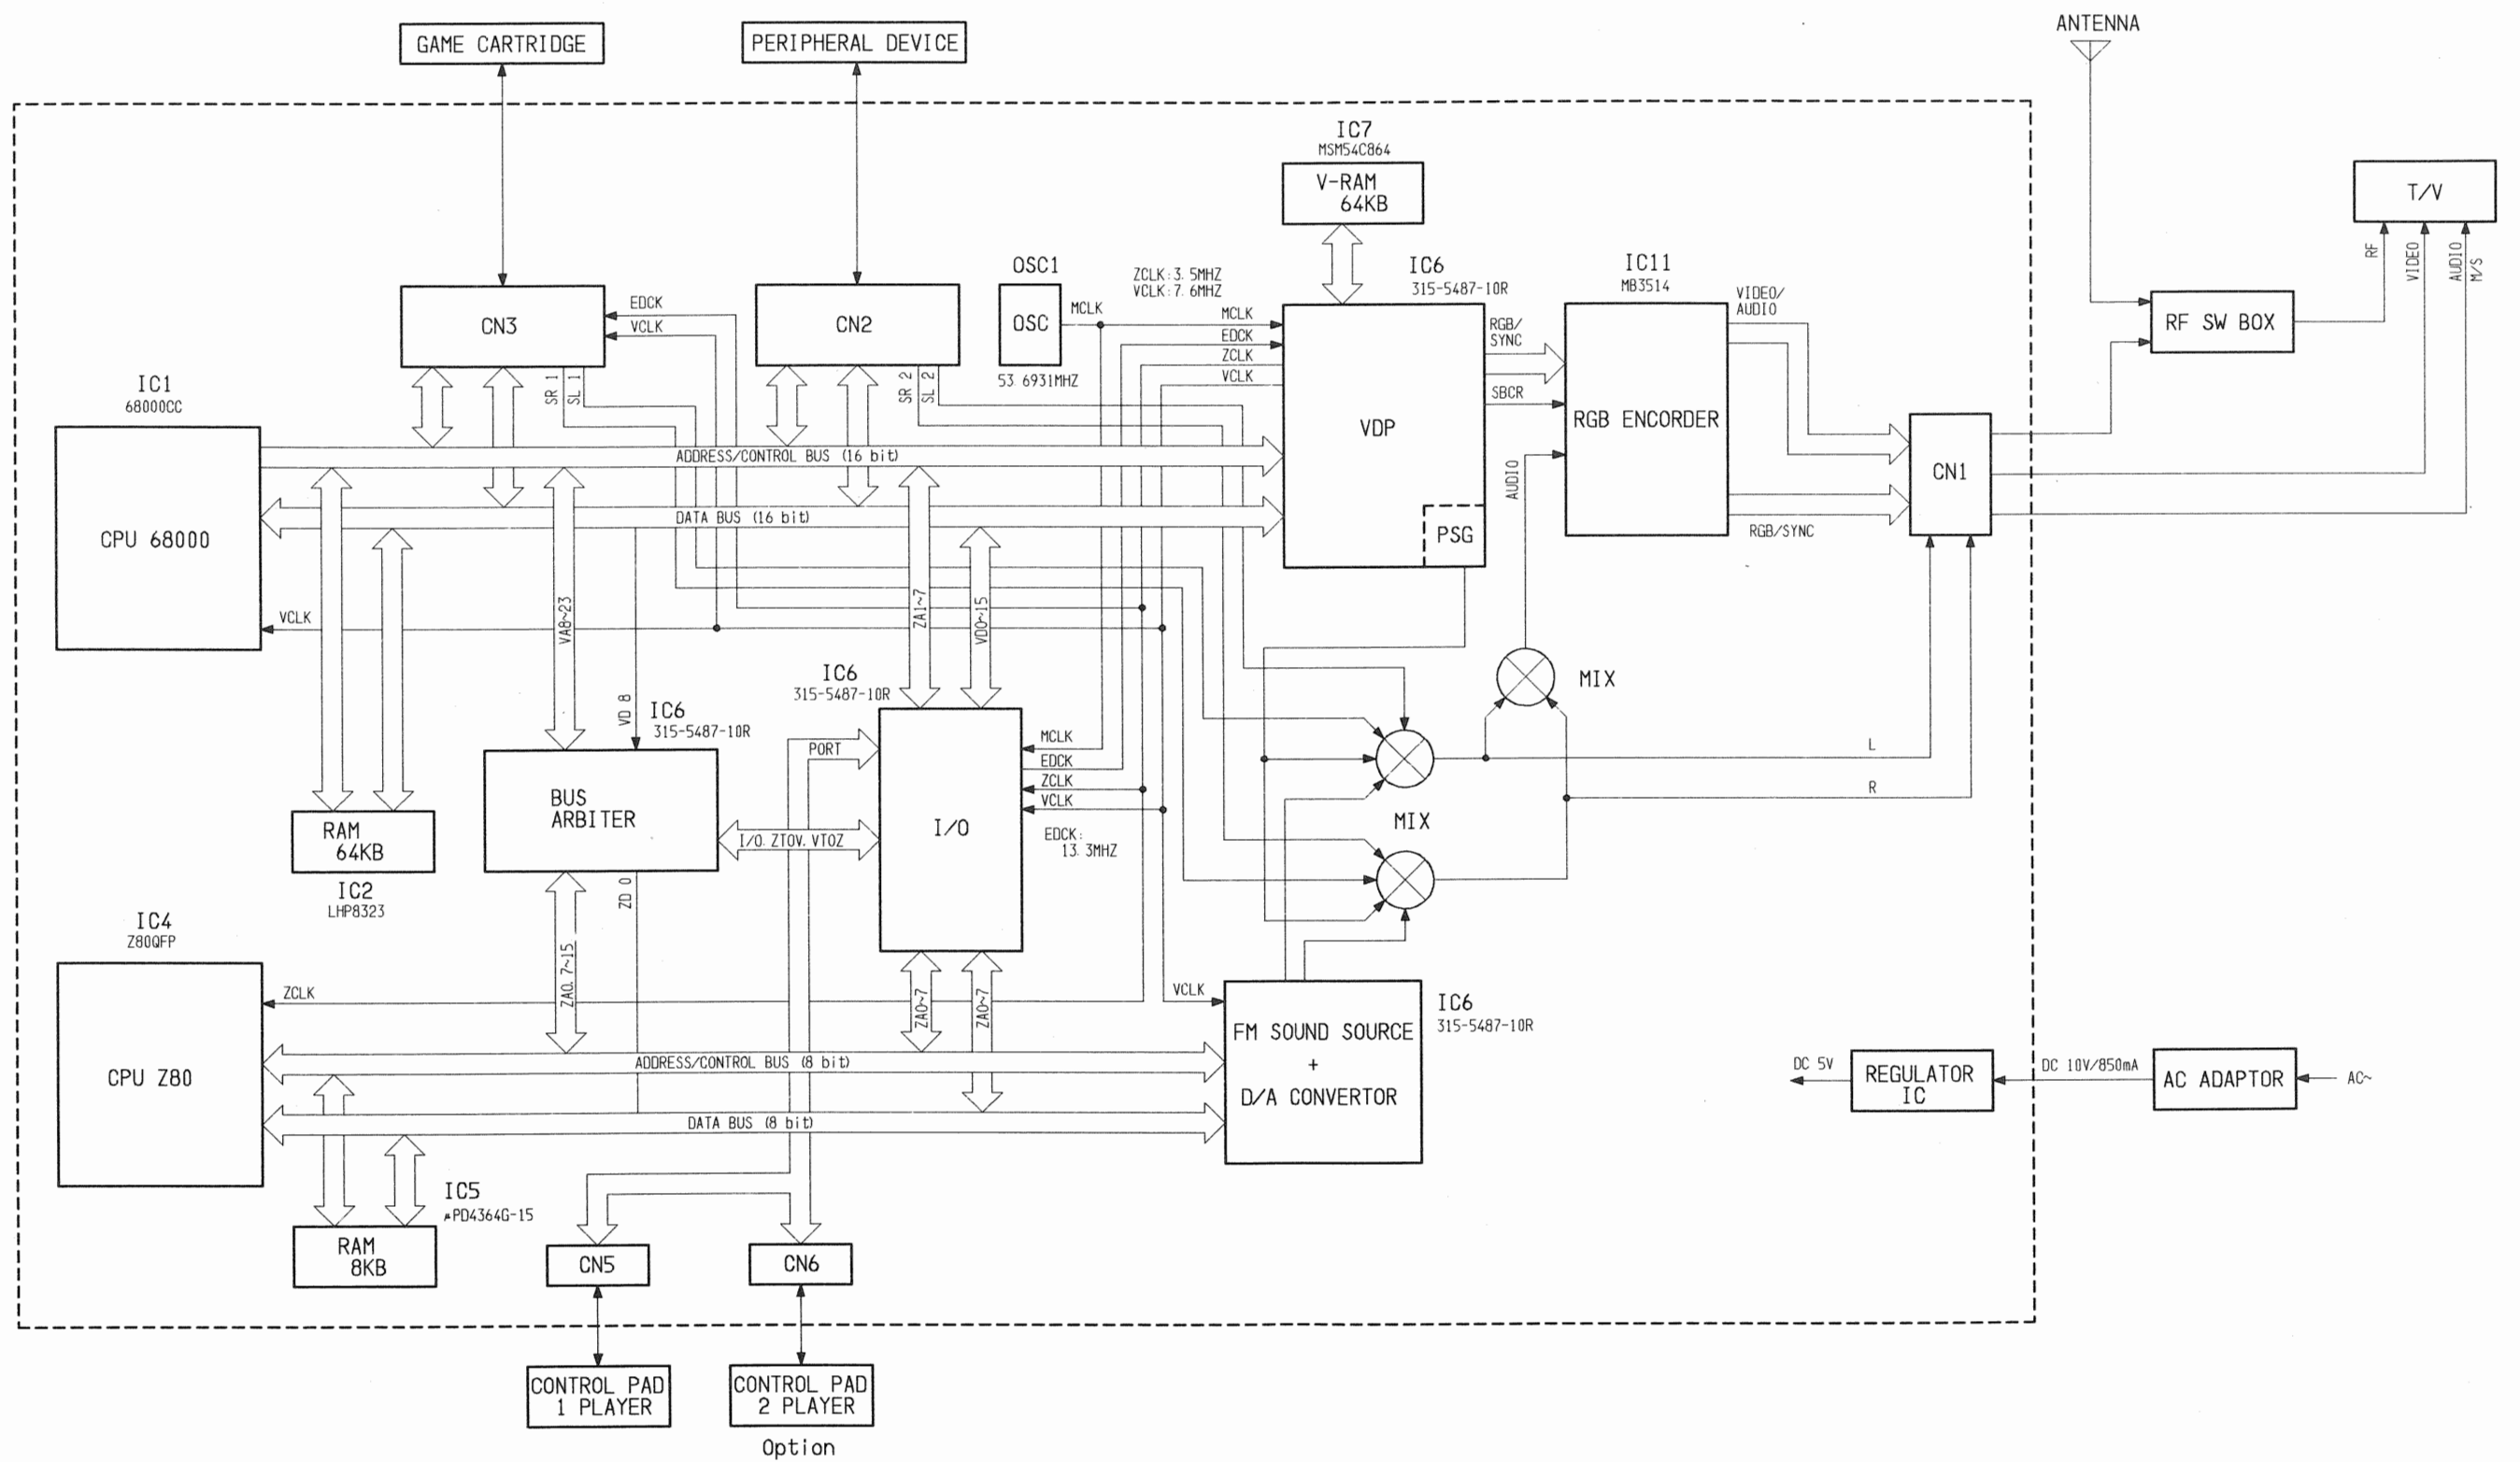

MAIN C.B (Top View)

- Differences in the circuits are shown in the difference table in the schematic diagrams.
- In the parts list, differences are shown in the REMARKS columns.
- This unit is a revision of GENESIS II, and IC9 and IC10 have been integrated into one chip.
- Accompanying this integration, the circuits have also been changed and the board has been made slightly smaller.
- Refer to the following for differences regarding parts that have been changed.
- For the details of changes, refer to this service manual and service manual No. 001 or manual No. 001-2 that is a revision of manual No. 001 to compare the differences.
